HYDRA-FLEX PRODUCTS**

BREAKTHROUGH POWER

**DURABLE, LONG-LASTING
SEWER JETTING NOZZLES**

THE CORE OF OUR NOZZLES

At the core of every Hydra-Flex nozzle is flow-straightening technology, where laminar flow is utilized to ensure every particle of fluid flows along one smooth path to offer more impingement while using less water.

STOCK YOUR TOOLKIT

The Reaper(s) are designed for different size pipes and different applications. Techniques, all deserve a spot in every sewer jetting toolkit.

THE EXPERTS YOU CAN TRUST

Our team of more than 100 passionate problem-solvers are equipped with the resources to innovate, engineer, test, and manufacture quality products that are measurably better.
